PROJECTS

SalesFlow CRM | Personal Full-Stack Project | May 2026 – Present

GitHub: <https://github.com/luphihung-dev/SalesFlow-CRM>

Live Demo: <https://cedar-salesflow-crm.netlify.app/>

Tech Stack: Java, Spring Boot, Spring Security, JWT, PostgreSQL, JPA/Hibernate, React, Vite, Tailwind CSS, Axios, Recharts, REST API, Git, GitHub, Netlify, Railway, Neon PostgreSQL

- Developed a Salesforce-inspired full-stack CRM application with customer management, deal pipeline tracking, task queue, activity timeline, and dashboard analytics.
- Implemented JWT authentication and role-based access control for Admin, Manager, and Sales users using Spring Security.
- Designed team/owner-based data visibility to simulate CRM data ownership, sharing, and permission concepts.
- Built RESTful APIs with Spring Boot, JPA/Hibernate, and PostgreSQL for customers, deals, tasks, activities, and dashboard reporting.
- Created responsive React interfaces with Tailwind CSS, Axios, and Recharts to support desktop and mobile CRM workflows.
- Implemented backend automation concepts inspired by Salesforce Flow and Apex Trigger-style events for workflow updates and activity tracking.
- Deployed the frontend on Netlify, backend on Railway, and database on Neon PostgreSQL.

3D Developer Portfolio Website | Personal Project | May 2026 – Present

GitHub: <https://github.com/luphihung-dev/lu-phi-hung-portfolio>

Live Demo: <https://luphihung-dev.netlify.app/>

Tech Stack: React, Vite, Tailwind CSS, Three.js, JavaScript, Responsive UI Design, Lucide React, Git, GitHub, Netlify

- Developed and deployed a responsive one-page portfolio website to showcase full-stack projects, CRM/Salesforce learning direction, technical skills, and contact information.
 - Built a lightweight Three.js hero scene with animated CRM/data-flow visuals, floating customer nodes, pipeline stages, and subtle motion effects.
 - Implemented a modern recruiter-focused UI using React, Vite, Tailwind CSS, reusable components, responsive layouts, and accessible links.
 - Added project sections for SalesFlow CRM, screenshots, CRM/Salesforce concept mapping, technical skills, about, and contact information.
 - Deployed the website on Netlify with GitHub-based continuous deployment.
-

EDUCATION

Bachelor of Information Technology

University of Greenwich Vietnam | Expected 2027

Relevant Coursework:

- Object-Oriented Programming
- Web Development
- Database Systems
- Software Engineering

**ADDITIONAL
INFORMATION**

- Languages: English, Vietnamese
- Availability: Open to internship opportunities in software engineering, Java backend, full-stack web development, and CRM/Salesforce-oriented roles.
- Strong interest in CRM systems, web application development, and software engineering practices.
- Collaborated with frontend and backend integration concepts through CRM workflow implementation.

SKILLS

Programming Languages:

Java, JavaScript, SQL

Web Technologies:

HTML5, CSS3, REST API

Tools & Concepts:

Git, GitHub, Agile Methodology, Scrum, CRM Systems
